INT.CL. : B60N 2/36 B60R 7/04

TITLE : FLAT DECK STRUCTURE

ABSTRACT : PROBLEM TO BE SOLVED: To provide a flat deck structure in which a storage space can be ensured in a rear part of a third seat even in a condition of its use and a lower part of a deck board forming a flat surface can be utilized as a pocket.

SOLUTION: A back plate 32 is mounted in a back surface of a third seat back 28, and a floor panel 34 is journaled to an upper end of the back plate. A frame unit 36 is vertically provided behind a third seat 14, and an opening in an upper part of the frame unit 36 is made openable/closable by a deck board 16. A rear seat back 20 is brought down to the front, thereafter the third seat back 28 is brought down to the front, the floor panel 34 is turned, and when it is linked to a rear end of the rear seat back 20, a flat surface is formed. Even when an occupant is seated on the third seat 14, an article can be stored in the upward of the deck board 16. Even when the flat surface is formed, an article can be stored in the inside of the frame unit 36.
